

Tier 2/3 Market Expansion Strategy

Accelerating residential adoption in India's \$40B growth frontier.

Growth Focus

Targeting 5x growth in non-metro regions through hyper-local ecosystems.

Solving for High-Trust, Neighborhood-Driven Decisions

Rajesh Mehta

Tier 2/3 Homeowner

Property Type

Independent House

Roof Potential

300–500 sq. ft. Clear Space

Location

Semi-Urban (Tier 2/3)

The Motivator

Visceral anxiety over rising electricity bills (typically ₹3,000–₹10,000+) combined with a desire for community status.

Seeking Financial Relief & Pride

The Decision Loop

Relies almost exclusively on **neighbor referrals** and local "experts" (electricians/contractors) rather than digital ads.

Digital Marketing Blindspot

The Trust Barrier

Deep fear of roof leakage and **"fly-by-night"** local vendors who vanish after installation.

Major Objection to Overcome

Referral Power vs. Brand Equity

Safety Gap

Unorganized = Safety Risk

WindPro Solution

Output Loss

Maharashtra ROI

High Tariff Potential

Payback Period
1.5–2 Years

Strategic Focus
Hyper-Local Trust

The Solar Ace Partner Program

Converting Local Influence into Scalable Distribution

Partner-Led Model

Recruit **SolarPro Partners**(local architects, CAs, & electricians) to drive high-trust referrals.

Earning Potential

₹50K–₹70K/mo

Physical Presence

Establish **Experience Centers** in key clusters like Lucknow and Vadodara.

 Bridging the Digital-Physical Trust Gap

The "Zero-Down" Pitch

Leverage subsidy + low-interest EMI to ensure **Monthly Saving > EMI**.

SUBSIDY

₹78,000

"Zero-Cost" Upgrade

Service-First Branding

Lead with the **"GoodZero" Program**, focusing on guaranteed outcomes.

 Guaranteed Bill Reduction, not just hardware sales.

Cluster-Based Domination

Scaling for Operating Leverage

Strategy Goal
Density = Profitability

Navigating Regulatory and Operational Hurdles

Proactive Solutions for Predictable Growth

Identified Risk	Mitigation Strategy
 Subsidy Delay DBT portal lag causes customer frustration and cash flow concerns.	 End-to-End Management Dedicated SolarSquare desk handles all DISCOM approvals and portal follow-ups, removing the burden from the customer.
 Price Undercutting Local players using low-quality, non-ALMM components to offer lower upfront costs.	 Value Guarantee Highlight theWindProleakage-free warranty (170 kmph) and long-termSolar Prohealth checks.
 Grid Stability Power outages in Tier 3 towns making standard on-grid systems less effective.	 Hybrid Shift Pilot and deploy "Solar + Storage" solutions in regions with high downtime (e.g., MP clusters) to ensure continuity.

Defining Success

The "North Star" Metrics

Projected TAM
\$40 Billion
